*Fewer than 3 reports or less than 1/10 of a percent of acres in the specific geographic region.

^{1/} Northeast, Southeast, Trans-Pecos, Coastal Bend, Upper Coast, South Texas and the Lower Valley Districts are combined into 'Other Districts'. Districts are combined to avoid disclosure of individual reports.

^{2/} Other varieties reported by fewer than 3 producers or accounting for less than 1/10 of a percent of acreage planted in the respective region: 2137, AA Experimental, Albany, Art, Banner, Big Max, Burchett, Byrd, Caudillo, CJ, Coker 9474, Coker 9700, Concho, Covington, Custer, Darrell, Denali, Dinero, Doublestop CL Plus, EK 102, Everest, Forage Maxx, Gallagher, Iba, JS51, Kingrazer, LA821, LCS Mint, Mace, NK 812, Ogallala, Other Hard Red, Overland, Pioneer 25R57, Pioneer 25R63, Promontory, Protection, Ranger, SY Goliad, Santa Fe, Scout/Scout 66, Settler CL, Shocker, T81, TAM 107, TAM 200, TAM 201, TAM 302, TAM 305, TV 8535, Tall Blend, Thunderbolt, Tomahawk, Triumph, USG 3295, WB-Redhawk, and Wheatland

Texas Wheat Acres Planted for 2014 by Type

Survey Procedures

A sample of Texas Crop producers were asked to report acres of Wheat planted or to be planted for 2014 by variety during surveys conducted from November 2013 through January 2014. A wheat variety supplement was inserted with survey questionnaires for 5,399 producers sampled for the 2013 Row Crop County Agricultural Production Survey (CAPS) and 4,528 crop producers sampled for the 2013 December Agricultural Survey (DAS). Samples for the Row Crop CAPS and DAS were mutually exclusive, but did not provide a complete representation of producers who may only grow Small Grains. Thus, an supplemental sample of 1,189 small grain producers that were not in the 2013 end of year surveys were mailed a Wheat Variety Supplement.

Wheat variety data were collected by mail, telephone using paper forms, Computer Assisted Telephone Interview (CATI), and a limited number of face-to-face interviews using paper survey forms. From the three samples (CAPS, DAS and Supplemental), a total of 2,262 individual producers reported planting or intending to plant wheat for the 2014 crop. These reports provided 3,484 observations (acres for a variety) for summarization. The largest number of varieties planted by a specific producer was 9 unique varieties.

Individual reports were weighted based on size group within county. Size groups were assigned based on previously reported wheat acres planted. Samples were proportionally allocated across size groups within county to result in a balanced geographical representation of crop producers. Final weights were assigned to each report based on the number of records in the population within size group and county, divided by the number of usable reports within size group and county to adjust for survey non-response.
